

The Access Exchange

Website Update Request — Developer Handoff

Site	theaccessexchange.com (WordPress / Elementor)
From	Akosua Nsowah, Founder
Date	September 2026
Scope	Copy, navigation labels, page structure, forms, links and metadata. Keep the existing visual design. New blocks are specified

What this site has to do

Three audiences have to be convinced within one screen each. A senior leader deciding whether to give us ninety minutes on camera. A university deciding whether to book a campus engagement. An organization deciding whether to put its own leaders forward. Every item below serves one of those three.

Copy in a shaded box is final. Paste it word for word. Nothing here is waiting on further content. Complete the sections in order.

Correct the contact address before anything else. Earlier drafts used `connect@accessexchange.com`. The correct address is **`connect@theaccessexchange.com`**. This is the only email address that should appear anywhere on the site or receive any form submission. Verify the mailbox exists and that a test submission arrives before the job is marked complete.

Two standing rules

- Nothing goes live in a state where a visitor can click something that does not exist. If a section is not ready, keep it draft.
- Do not state audience numbers, recruiting outcomes, past engagements or results that have not happened. Everything on this site must be verifiably true today.

SECTION 0 Site architecture. Read this before starting.

The site has five public pages. Each one has a single job and a single primary call to action. Build to the table below. The Interview Series is the front door. Campus engagements are reached from the persistent header button on every page and from the first card in the homepage three-path block.

Navigation

Header, left to right:

Interview Series | Universities | Guests | Partnerships | About

Persistent header button, on every page:

Bring Us to Campus → /universities/#enquire

The header button keeps campus one click from every page. Split the current combined Guests and Partners page into two pages: duplicate it first, then separate the content cleanly.

What each page is for

Page	Job it does	Primary CTA
Home	Say what this is in one screen and route three audiences	Watch the Interview Series
Interview Series	Prove the product is real and worth a leader's time	Be Considered as a Guest
Universities	Sell a paid campus engagement or partnership	Request a Campus Engagement
Guests	Tell a senior person exactly what taking part involves	Be Considered as a Guest
Partnerships	Give an organization a concrete reason to fund this	Explore Partnerships
About	Establish who is behind it and how the model works	Be Considered as a Guest

Pages to retire

- **Live Experiences.** Remove from the navigation. There are no events to show, and an empty page weakens every other claim. Live experiences remain as an option inside the Partnerships page.
- **Coach Training and Certification.** Set to draft and remove both footer links. Keep the page structure so it can be restored.
- **Coaching.** Keep the coaching page live, remove it from the main navigation, and link to it from the footer.

SECTION 1 Remove what is not true. Do this first.

1.1 Delete all placeholder and test interview content

WHERE

Homepage featured interview block; Interview Series page (featured, Most Watched, archive grid, Takeaways grid); all associated interview detail pages.

CURRENTLY

Two interviews are published that do not exist. Visible problems: the text "Blender Video as placeholder" printed on the page; alt text reading "test-image"; a guest bylined "David Okafor" whose alt text says "Daniel Okafor"; "Maria Chen" appearing as "Marie Chen" on the Takeaways card; an episode labeled "Episode 12" when only two exist.

Delete the placeholder interviews, takeaways and detail pages entirely rather than hiding them. Old URLs should return a 404 or redirect to the Interview Series page. Replace the empty space with the block in item 3.2.

1.2 Fix the contact address, social metadata and image filenames

WHERE

Site-wide. Open Graph settings, media library, all forms.

CURRENTLY

The Open Graph share image is named "ChatGPT-Image-Aug-17-2026-08_58_45-PM.png" and the filename is publicly visible in the page source. og:site_name is set to "WordPress".

Complete all of the following:

- Every form submission routes to **connect@theaccessexchange.com**. No other email address appears anywhere on the site.
 - Re-upload the share image as the-access-exchange-share.png.
 - Set og:site_name to The Access Exchange.
 - Add descriptive alt text to every image. No alt text may contain the words test, placeholder or ChatGPT.
-

1.3 Standardize language and spelling

WHERE

Site-wide, all pages.

CURRENTLY

British and American spellings are mixed. Separately, the phrase "get closer" and its variants recur throughout and read as vague.

- Convert to American English: program, organization, recognize, personalize, specialize, prioritize. Do not change direct quotations or proper nouns.
 - Replace "get closer" phrasing with direct connection and access language, as specified in the copy blocks throughout this document.
-

SECTION 2 Homepage.

2.1 Replace the hero

WHERE

Homepage hero.

CURRENTLY

The opening states an idea but never says what the organization operates.

CHANGE TO

H1: Get connected to the people and decisions shaping what's next.

The Access Exchange is an interview platform and campus engagement partner. We record long-form conversations with experienced leaders about how the work actually gets done, then bring those leaders directly to students.

Primary button: Watch the Interview Series

Secondary button: Bring Us to Campus

The campus CTA stays in the header on every page and leads the three-path block in 2.2. It should not be the hero's primary button.

2.2 Build a three-path block directly below the hero

WHERE

Homepage, below the hero and above the existing narrative copy.

CURRENTLY

Calls to action for four different audiences are scattered across the page as flat links.

CHANGE TO

Section heading: How do you want to connect?

Universities and institutions

Bring experienced leaders directly to your students through curated speaking engagements and moderated conversations built around your audience and learning goals.

Button: Request a Campus Engagement

Leaders

Join the Interview Series and share the decisions, lessons and turning points behind your work.

Button: Be Considered as a Guest

Organizations

Partner on interviews and campus programs that feature credible leaders and create direct engagement with students and emerging professionals.

Button: Explore Partnerships

Universities first. Do not merge these into one generic Get Involved path.

2.3 Add an Interview Series block

WHERE

Homepage, after the three-path block.

CURRENTLY

The interview series is the core product but has no dedicated homepage presence beyond a single featured card.

CHANGE TO

Section label: The Interview Series

Heading: Conversations that reveal how the work actually gets done.

Long-form interviews with experienced leaders, founders and practitioners about the decisions, setbacks, relationships and turning points behind their careers. Every conversation is published in full, with the standout ideas written up alongside it.

Format line, displayed as four short items:

45 to 60 minutes | Professionally moderated | Two-camera production | Full episode plus selected clips

Primary button: Watch the Interview Series

Secondary button: Be Considered as a Guest

2.4 Replace the two abstract sections with a concrete one

WHERE

Homepage, the narrative section beginning "Some of the most valuable things people know", and the "Four things worth getting closer to" section below it. Place the replacement between the three-path block and the Interview Series block.

CURRENTLY

Two consecutive sections run roughly 150 words and state the same idea four different ways without naming one concrete thing the organization does. A visitor reaches the middle of the homepage still unsure what happens here.

CHANGE TO

Keep only these two lines of the existing narrative:

Some of the most valuable things people know never make it into a textbook, a search result or a job description. They live in experience, and they usually reach whoever already happens to know the person.

Then, immediately below, add this block.

Heading: In practice, that means three things.

1. Interviews. We record long-form conversations with experienced leaders about the decisions, setbacks and turning points behind their work, and publish every one in full, free to watch.

2. Campus. We bring those same leaders onto campuses for speaking engagements and moderated conversations built around a specific group of students.

3. Partnerships. We work with organizations that want their leaders in those conversations and want to reach the students in the room.

Delete everything else from the two existing sections, including "Knowledge becomes more powerful when it moves" and "The Access Exchange gives that experience somewhere to travel".

The four pillars, Knowledge, Perspective, Access and Opportunity, move to the About page as a single section under the heading **What access means here**, using these descriptions: **Knowledge.** The specifics. What a decision actually cost, what the numbers looked like, what the timeline really was. **Perspective.** The reasoning. How someone weighed the options at the time, and what they would weigh differently now. **Access.** The room. Direct proximity to people whose time is usually reached by knowing somebody already. **Opportunity.** The outcome. What becomes possible once the first three are in your hands.

2.5 Add the founder block

WHERE

Homepage, after the Interview Series block.

CURRENTLY

The founder's name does not appear anywhere on the homepage.

CHANGE TO

Heading: Who is behind The Access Exchange.

The Access Exchange was founded by Akosua Nsowah, a cyber risk, privacy and technology audit leader with more than a decade of experience across EY, Tokio Marine HCC, Freddie Mac and the U.S. Department of State. She holds an M.Eng. in Cybersecurity from George Washington University and the CISA, CDPSE and CCRP credentials.

Button: Meet the Team

Use the founder photograph already on the About page.

2.6 Rewrite the email capture

WHERE

Homepage, the existing "Stay close to what's coming" block, and repeat in the footer.

CURRENTLY

The current block asks for an email without saying what the reader receives.

CHANGE TO

Heading: One email a week.

The idea worth keeping from each conversation, plus new interviews and campus dates. No more than one email a week. Unsubscribe in one click.

Button: Subscribe

Connect this to a real mailing list, not a form that sends to an inbox. Confirm the double opt-in and confirmation email both work before sign-off.

SECTION 3 Interview Series.

3.1 Replace the Interview Series page opening

WHERE

Top of /interview-series/.

CURRENTLY

The page opens with a headline and a single line, then moves straight into episodes that do not exist.

CHANGE TO

Section label: Go beyond the biography.

H1: The conversations behind the credentials.

The Access Exchange sits down with experienced leaders, founders and practitioners for long-form conversations about the decisions, setbacks, relationships and turning points that shaped their work. The goal is not inspiration alone. It is perspective someone can actually use.

What you get from every conversation, as four short items:

Decisions. What they chose, and why.

Tradeoffs. What was actually at stake.

Turning points. What changed the direction.

Lessons. What they would repeat, avoid, or do differently.

Format: 45 to 60 minutes | professionally moderated | two-camera production | full episode plus selected clips

Editorial focus: Substantive lessons and lived experience, not promotion.

3.2 Build the Confirmed Guests block

WHERE

Homepage, in place of the deleted featured interview. Condensed version at the top of the Interview Series page.

CURRENTLY

A featured interview that does not exist.

CHANGE TO

Section label: Founding Season

Heading: The first conversations are already booked.

The inaugural season brings together experienced leaders and builders across energy finance, quantitative markets, software, technology risk and regulatory strategy.

Guest cards, in this order:

Cheri Allen

Oil and Gas Loan Origination, Truist Securities. Corporate and Investment Banking, Houston.
Two decades in energy lending, originating and structuring credit for exploration, production and midstream companies.

Bethel Kameni

Builder, Blue Mountain Sky Technologies, Houston.
A finance professional turned builder, working across quantitative investment strategy, data sourcing, execution and market structure. NYU Tandon School of Engineering.

Samad Ahmed

Founder, Chamoy Labs, Houston.
Builds software designed around how people already think and work, rather than systems that ask people to adapt to them.

Shukur Jamalov, CISA

IT Audit, Cybersecurity and AI Governance Leader.
More than a decade helping global organizations manage technology risk, now focused on AI governance, risk assessment and regulatory readiness.

Angelica Jamalov

Legal, Business and Compliance Professional.
Works across multi-jurisdictional regulatory research, compliance and licensing, translating complex requirements into practical decisions for the business.

Primary button: Be notified when the first interview publishes

Secondary button: Be Considered as a Guest

Build as a repeatable card block so guests can be added without a developer. Publish a card only after Akosua confirms in writing that the guest has approved the use of their name, title and employer. Use these same descriptors for Shukur Jamalov and Angelica Jamalov on the About page so the two pages do not contradict each other.

3.3 Keep and label the Takeaways section

WHERE

Interview Series page, existing Takeaways section.

CURRENTLY

The section exists but currently shows placeholder items and has no explanation of what it is for.

CHANGE TO

Heading: What travels out of the conversations.

Standout ideas, frameworks, clips and written pieces, each linked back to the interview it came from.

Empty the filter counts until real items exist. Do not display categories showing zero.

SECTION 4 Universities. This is the paid offering.

4.1 Replace the Universities page opening

WHERE

Top of /universities/.

CURRENTLY

The page describes formats but never states that these are professional paid engagements or who inside a university it is addressed to.

CHANGE TO

H1: Connect your students directly with experienced leaders.

The Access Exchange curates paid campus speaking engagements and moderated conversations that give students practical access to how careers, industries and major decisions actually work.

Audience line:

Built for Career Services, Student Success, Schools and Departments, Honors and Leadership Programs, and Student Organizations.

Primary button: Request a Campus Engagement

Secondary button: Explore a University Partnership

4.2 Add a value block

WHERE

Universities page, directly after the opening.

CHANGE TO

Heading: One partner for speaker curation, preparation, honoraria and moderation.

Tell us the audience, the objective and the topic. The Access Exchange identifies the right speaker, shapes the session, coordinates the speaker, manages the honorarium and moderates the engagement.

The right speaker for the room. Speaker profile and topic matched to your students and objectives, not a generic keynote.

Built for student participation. Open Q and A and moderated discussion give students direct access to the reasoning behind real decisions.

One point of contact. We coordinate program structure, speaker preparation, honorarium and moderation with your team.

One event or a recurring series. Book a standalone engagement or build a semester or academic-year partnership.

4.3 Add the engagement and partnership model

WHERE

Universities page, before the session formats.

CHANGE TO

Heading: Campus Engagements and University Partnerships

Standalone Campus Engagement. One curated speaking engagement, moderated leadership conversation or industry session tailored to your students and goals.

University Partnership. A multi-engagement program across a semester or academic year, with coordinated themes, priority scheduling and preferred partnership pricing.

Founding University Partners. A limited number of institutions joining during the inaugural year receive introductory partnership pricing and priority scheduling.

Pricing language, displayed in full:

Campus programs are paid engagements. Fees are quoted based on the speaker, format, location and production needs. The Access Exchange handles speaker coordination, honorarium management, program preparation and moderation. Any travel or special production costs are disclosed in advance.

Do not publish dollar amounts. Quote each program by scope. Display the Founding University Partners line with the same visual weight as the other two options.

4.4 Use these four campus formats

WHERE

Universities page, replacing the current four unlabeled formats.

CURRENTLY

The four formats are named but give no length and no stated outcome.

CHANGE TO

01. Leadership Talk and Q and A — 60 minutes

A 35 minute leadership session followed by 25 minutes of open student questions. Students leave with a clearer picture of how one senior career was actually built and direct answers to their own questions.

02. Moderated Leadership Discussion — 75 minutes

A guided conversation with one or two leaders followed by audience questions. Students leave understanding the reasoning behind real decisions, not just the outcomes.

03. Industry Session — 90 minutes

A topic-driven program with practitioners working in the field today. Students leave with a current view of the work, the skills and the priorities shaping the field.

04. Custom Campus Experience — half day or full day

Programming shaped around your students, academic programs, industry themes or institutional objectives, built with you.

4.5 Add a How It Works block

WHERE

Universities page, after the formats.

CHANGE TO

Heading: How booking works.

1. **Tell us the audience and the outcome.** Share your students, objective, topic interests and preferred timing.
2. **We recommend the speaker and format.** We curate the right speaker profile and shape the session around your goal.
3. **You receive a clear proposal.** Program scope, total fee, and any approved travel or production costs, confirmed in writing.
4. **We coordinate and host.** We prepare with the speaker and the institution, moderate the engagement, and keep the student experience at the center.

4.6 Update the campus enquiry form

WHERE

Universities page form.

CURRENTLY

The current form does not collect enough to produce a quote.

Fields, in this order:

- Name
- Job title
- University or institution
- Department or program
- Work email
- Expected audience size
- Student level: Undergraduate / Graduate / Mixed
- Preferred timeframe or date
- Topic or industry of interest
- What are you interested in? Standalone Campus Engagement / Multi-Event University Partnership / Not sure yet
- What would you like students to leave with?
- Anything else we should know?

Form button: **Request a Campus Engagement.** On submission, show an on-screen confirmation and send an automatic acknowledgment to the sender. Route the submission to connect@theaccessexchange.com. Do not include a budget field.

SECTION 5 Guests and Partnerships. Split into two pages.

5.1 Build the Guests page

WHERE

/guests/, separated from the current combined Guests and Partners page.

CURRENTLY

Guest and partner content share one page, so a senior leader considering taking part has to read past a sponsorship pitch to find out what is being asked of them.

CHANGE TO

H1: Join a conversation that goes beyond your title.

The Access Exchange invites experienced leaders, founders and practitioners to unpack the decisions, setbacks, relationships and lessons behind their work in a professionally produced long-form interview.

What taking part involves:

A short preparation call to agree the ground the conversation will cover.

A 45 to 60 minute professionally moderated conversation.

A professionally produced full-length episode, published in full.

Selected short-form clips and a written piece drawn from the conversation.

A discussion centered on useful experience rather than promotion.

There is no cost to take part, and no cost to watch.

Button: Be Considered as a Guest

Keep the existing guest submission form on this page. Route to connect@theaccessexchange.com and send an automatic acknowledgment.

5.2 Build the Partnerships page

WHERE

/partnerships/.

CURRENTLY

"Some of your strongest voices are already inside your organisation. Sponsor an interview. Nominate a leader." This asks a company to act without stating the value to them.

CHANGE TO

H1: Put your leaders in substantive conversations with the people you want to reach.

The Access Exchange partners with organizations on interviews and campus programs that feature credible executive voices and create direct engagement with students and emerging professionals.

Executive Interview Partnership. Feature an executive or practitioner in a high-quality conversation built around their expertise, decisions and industry perspective.

Campus and Talent Engagement Partnership. Support a campus conversation or series aligned with your talent, community or industry priorities, with clearly identified partner visibility.

Custom Series or Live Experience. A broader collaboration across interviews, campus programming and live experiences, built around shared objectives.

Button: Explore Partnerships

Lead with concrete value: credible executive visibility, direct engagement with students, professionally produced programming. Do not promise recruiting outcomes, audience figures or business results that have not been demonstrated.

5.3 Add an editorial standard to the Partnerships page

WHERE

Partnerships page, below the partnership options.

CHANGE TO

Heading: Credibility comes first.

Guest selection and editorial direction are guided by relevance, expertise and audience value. Sponsored collaborations are clearly identified and do not determine editorial conclusions.

This short block is what allows a serious organization to associate its name with the series. Do not cut it for space.

SECTION 6 About page.

6.1 Restructure the team section

WHERE

About page.

CURRENTLY

Three people are presented with long biographies and no stated relationship to The Access Exchange, which leaves the roles ambiguous.

- Heading: **The people behind the platform.**
 - Akosua Nsowah is labeled **Founder**. She is the sole founder. Do not label any other person Founder or Co-founder.
 - Everyone else is labeled **Team Member**, with no Access Exchange job title.
 - For each team member, show two or three credibility signals only: current professional field, major organizations, education, professional credentials. Use the same descriptors as the guest cards in item 3.2.
 - Add a LinkedIn link for each person where one is available.
 - Do not inflate credentials or add titles that do not exist.
-

6.2 Add a platform model block

WHERE

About page.

CHANGE TO

Heading: What The Access Exchange does.

Interview Series. Long-form conversations with experienced leaders, published in full and free to watch.

Campus. Speaking engagements and university partnerships that bring experienced leaders directly to students.

Partnerships. Organizations put their leaders forward and support the programming that reaches students.

Coaching. One-to-one guidance for recent graduates and mid-career professionals navigating a pivot or strengthening their positioning.

Keep this descriptive. It states what the organization does, not how it is funded or structured. No revenue, growth or business-model language anywhere on the public site.

6.3 Update the proof block and footer

WHERE

About page stat block, and the global footer.

CURRENTLY

The stat block reads Houston, Six, Free, In full, which describes the format rather than any traction.

CHANGE TO

Replace the stat block with:

Houston — Where we are

Five — Confirmed guests for the inaugural season

Free — Full interviews to watch

In full — Every conversation

Footer legal line:

© 2026 The Access Exchange LLC. Houston, Texas.

Footer contact block:

Email: connect@theaccessexchange.com

LinkedIn: linkedin.com/company/theaccessexchange

Update the number Five whenever it changes. "Free" applies only to watching the Interview Series and to taking part as a guest. It must never appear near campus programs. Omit the LinkedIn line if the company page does not exist yet.

SECTION 7 SEO, analytics and final QA.

7.1 Set page titles and meta descriptions

WHERE

SEO plugin or WordPress page settings.

Home

Title: The Access Exchange | Interview Series and Campus Engagements

Description: The Access Exchange connects universities and emerging professionals with experienced leaders through long-form interviews and campus speaking engagements.

Interview Series

Title: The Access Exchange Interview Series | Conversations Behind the Credentials

Description: Long-form interviews with leaders, founders and practitioners about the decisions, setbacks, turning points and lessons behind their work.

Universities

Title: University Speaking Engagements | The Access Exchange

Description: Bring experienced leaders and practical industry perspective to your students through curated campus speaking engagements and university partnerships.

Guests

Title: Become a Guest | The Access Exchange

Description: Join The Access Exchange Interview Series and share the experience, decisions and lessons that can help others move forward.

Partnerships

Title: Partnerships | The Access Exchange

Description: Partner with The Access Exchange on executive interviews and campus programming that engage students and emerging professionals.

7.2 Install analytics and form tracking

WHERE

Site-wide.

CURRENTLY

There is no measurement in place, so there is no way to report traffic, sources or inquiry volume.

- Install Google Analytics 4 across all pages.
- Track each form submission as a distinct conversion event: campus enquiry, guest submission, partnership inquiry, newsletter signup.
- Add a hidden source field to every form recording which page the submission came from.
- Confirm events fire correctly in real-time reporting before sign-off.

7.3 Final test before marking the job complete

WHERE

Whole site.

- Submit every form on desktop and mobile. Confirm each message arrives at connect@theaccessexchange.com and that the sender receives an acknowledgment.
- Confirm every form shows an on-screen confirmation after submission.
- Click every header, footer, card and CTA link. Fix every broken link and anchor.
- Confirm the guest form and the partnership form are separate and route correctly.
- Search the public site for: coach certification, Blender, test-image, placeholder, coming soon, organisation, programme. Remove or correct every occurrence.
- Confirm no campus copy anywhere uses the words free, no cost or complimentary.
- Preview every page on mobile. No heading, card, form or button should clip or overlap.
- Test the homepage social share preview and confirm The Access Exchange appears as the site name and the correct image loads.

DELIVERY ORDER Complete in this sequence.

	Step	Section
1	Correct the contact address to connect@theaccessexchange.com	1.2
2	Delete all placeholder and test content, fix metadata and spelling	1.1, 1.2, 1.3
3	Update the navigation and retire Live Experiences and coach certification	Section 0
4	Rebuild the homepage: hero, three paths, what we do, series block, founder, email	2.1 to 2.6
5	Rebuild the Interview Series page and publish the Confirmed Guests block	3.1 to 3.3
6	Rebuild Universities as a paid engagement and partnership offer	4.1 to 4.6
7	Split Guests and Partnerships into two pages	5.1 to 5.3
8	Restructure the About page	6.1 to 6.3
9	SEO, analytics, then full QA pass	7.1 to 7.3
