DEFAULT PROJECT RULES

- ✓ **Read Every Word Carefully:** Give importance to each message. Understand the client's vision, preferences, and requirements thoroughly before starting any work.
- ✓ **Research 3-5 Best Design Stores:** Find the top performing stores in the client's niche. Study their design patterns, layouts, color schemes, and user experience. Spend up to 5 hours on research - this is an investment.
- ✓ **Get Early Approval:** Share reference stores with the client before development. Get their feedback on design direction early to avoid major revisions later.
- ✓ **Replicate & Customize:** After approval, replicate similar design elements onto the client's store while adding custom touches that make it unique.
- ✓ **Use AI for Brainstorming:** Copy the entire chat into ChatGPT or similar AI tools. Ask it to extract key requirements, identify pain points, and suggest solutions you may have missed.
- ✓ **Solid Research = Massive Progress:** The goal is that when development starts, you move fast with confidence because the groundwork is already done.
- ✓ **🚫 No Self-Centered Thinking:** We don't work with developers who only think inside their little world. Think from the client's perspective. Think about the end user. Everything you deliver must be the BEST it can be - no shortcuts, no "good enough".
- ✓ **✅ Self QA Before Delivery:** Before marking anything as complete, YOU must test and verify:
 - ✓ **Mobile Responsiveness:** Test on mobile, tablet, and desktop views
 - ✓ **Cross-Browser:** Check Chrome, Firefox, Safari, Edge
 - ✓ **All Links Working:** Click every button and link
 - ✓ **Forms Functional:** Test all forms, cart, checkout flow
 - ✓ **Images Optimized:** No broken images, proper alt texts
 - ✓ **Speed Test:** Run PageSpeed Insights, aim for 80+ score
 - ✓ **Spelling & Grammar:** Proofread all visible text

- o ✓ ✓ **Compare with Reference:** Does it match the approved design?

Hi Shreyansh, I'm considering your six-page package for . My company, The Access Exchange, is a tech-focused media and professional-development platform launching through an interview series and university partnerships. I would like the six pages to be: Home, Interview Series, University Partnerships, Interviews & Insights, About, and Contact. I will not need e-commerce or the 30-product setup included in the package. Would you be able to replace those features with separate guest and university inquiry forms, basic on-page SEO, video integration, and a brief handover showing me how to upload future interviews?

Please also confirm whether the design will be customized to my brand rather than based on a standard template, whether I will receive full administrator access and ownership, and whether the covers the complete six-page website without additional required charges.

I will create wordpress website design, redesign, ecommerce website development

25 Jul, 13:25

hii how are you

Seller

25 Jul, 13:26

Thanks for outlining your requirements so clearly.

I just wanted to let you know that the package and the features listed on that gig are from an older pricing structure. Our packages and scope have changed since then, so unfortunately we can't swap features or provide a complete custom rebuild within that package.

What you're describing is a fully custom website with branded design, custom inquiry forms, video integration, on-page SEO, admin handover, and full ownership, which falls outside the scope of that older package.

If you'd like, I'd be happy to prepare a custom offer based on your exact requirements and budget.

akosuaak

25 Jul, 13:38

Hi Shreyansh, thank you for clarifying. I understand that the package shown reflects an older pricing structure.

To provide some context, The Access Exchange is a tech-focused media and professional-development platform launching through an interview series and university engagement. The website will need to introduce the platform clearly, present the interview content, explain the university side, and provide simple ways for guests and organizations to get in touch.

I'm looking to start with a clean, professional, mobile-friendly six-page WordPress website that is easy for visitors to navigate and easy for me to update as new interviews are released.

Please let me know the most cost-effective option you can offer for this initial launch, along with what it would include, the delivery timeline, revisions, and any ongoing costs. I'm aiming to keep the first version lean and can add more advanced features as the platform grows.

akosuaak

25 Jul, 13:43

The initial six pages would be:

1. Home

2. Interview Series
3. University Partnerships
4. Interviews & Insights
5. About
6. Contact / Get Involved

akosuaak

25 Jul, 13:57

20 to 25 days seems like a very long time. Could you do it for less amount of time?

I will create wordpress website design, redesign, ecommerce website development

Seller

25 Jul, 13:57

how soon you want it to be done?

akosuaak

25 Jul, 13:58

You have a similar package on your packages with a delivery of 7 days

Seller

25 Jul, 13:59

as i already told, those are older plans with limited customizations, every development work includes different time

Seller

25 Jul, 13:59

if you let us know how soon you want it then i will see the most practical solution for this

akosuaak

25 Jul, 14:00

I really don't have a fixed amount of time. I just would like it as soon as reasonably possible.

Seller

25 Jul, 14:00

okayy i will try to do it as soon as possible

Seller

25 Jul, 14:01

20days is just for buffer only

akosuaak

25 Jul, 14:02

10 days?

Seller

25 Jul, 14:03

Would 15 days work for you? We can aim to complete it within that timeframe as long as everything goes smoothly and we receive the content and feedback promptly. That way, we can maintain the quality of the website without rushing the development process.

akosuaak

25 Jul, 14:04

Ok seems fair.

akosuaak

25 Jul, 14:04

I'm leaning towards the first package of a grand

Seller

25 Jul, 14:04

We'll definitely try to deliver it as quickly as possible. If everything goes smoothly and we receive the content and feedback on time, we'll aim to complete it within around 15 days.

We just don't want to promise 10 days and end up compromising on the quality. We'd rather deliver a polished website a few days later than rush the development. 😊

akosuaak

25 Jul, 19:20

600. I could pay 1000 but at the same time, this is a start up and it's hard to justify the initial cost of a for a website. I also don't wanna compromise too much on all the good features

I will create wordpress website design, redesign, ecommerce website development

Seller

25 Jul, 19:25

I completely understand your concerns, especially since this is a startup and every dollar matters in the beginning. That's exactly why I've already reduced the price from to without cutting any corners on the quality or features, and I'll be here to guide you even after the website is built whenever you need help.
