Preferred visual language: close editorial portraits, real conversation, architectural and campus environments, audiences listening, subtle production details and natural interaction.

First filming day - capture website assets: wide set shot; clean guest portrait; founder/host portrait; guest speaking; host listening; over-the-shoulder angles; camera/microphone details; natural pre/post-interview moments; vertical footage; and 5-10 second silent B-roll clips.

As original content becomes available, progressively replace temporary imagery with authentic Access Exchange photography and video.

18. Design & Colour Direction

Palette: Black #0A0A0A; Warm White #FAF9F6; Cream #F3EBDD; Champagne Gold #C6A15B.

Use black for authority and visual drama; warm white and cream for openness and generous negative space; champagne gold sparingly for fine accents, dividers, icons, hover states and select emphasis.

Desired feel: clean, executive, editorial, cinematic, modern, intelligent and human. Premium should come from restraint, typography, composition and imagery.

Logo: currently in development. Use a tasteful temporary text treatment of THE ACCESS EXCHANGE that can be replaced easily when the final logo is supplied.
